

Rehabilitation CPT Codes and Descriptions

Anthem Fully Integrated Dual Eligible (IN) Program

- Carelon adjudicates under a main treatment grouper, and a set of adjunctive service codes are separately reviewed.
- Providers can enter one treatment CPT code from the main treatment grouper on the request. Main treatment codes operate on a grouper concept.
- The grouper concept gives the provider the ability to render a variety of services, even if the plan of care changes, without updating the existing authorization.
- Providers should enter all adjunctive CPT codes on the request. Due to varying clinical evidence, these codes require additional review per the Carelon Clinical Guidelines.
- Determinations will be made on the main treatment grouper and each adjunctive grouper entered for the request. This may result in a mixed outcome, under the same authorization.
